

MODULAR SWITCHBOARDS

For custom switchboards larger than 1600A, Design Switchboards and Distribution can supply modular switchboard solutions through our certified partnership with **Schneider (PrismaSeT)** and **Rittal (R14 Power)**. These partnerships give our clients flexibility in their design and the confidence in the quality production. Both modular solutions are suitable for rated currents of up to 4000A.

Local And Reliable, Let's Talk!

[PrismaSeT Low Voltage Switchboards](#) are a modular and prefabricated solution that thoroughly integrates Schneider Electric switchgear offerings. A state-of-the-art modular design that not only helps optimise the switchboard footprint and ease scalability, PrismaSeT also achieves superior operational safety standards through comprehensive testing and validation, thereby complying with AS/NZS 61439.1&2 standards. Rated Operational current: up to 4000A. Degree of protection (IP): 42, 43 and 54.

*PrismaSeT Custom MSB with Impact Protection Rating of IK10

[Ri4Power](#), an individual system for the configuration of tested low-voltage switchgear with inner Form separation. Rated Operational current up to 4000 A. Degree of protection (IP): up to IP 54.
